

The first compact pool and spa management system worldwide!

Pool management systems conquer the swimming pool market. The many advantages of these "thinking computers" speak for themselves: a smooth operation, water care adapted to demand, customized system control, energy-saving programs, integration of renewable energies, control of attractions, easy operation, and much more!

There are plenty of other good reasons. Watercom compact systems comprise everything that modern pool technology requires in an ideal combination, pre-assembled in one system – space-saving, clearly arranged, user friendly and easy to maintain. An added bonus - the costly and time-consuming assembly of individual components is a thing of the past.

*Ecological
and economical*

*Can be remotely controlled via
smartphone, tablet, etc.*

*Convenient
and expandable*

Space-saving

dinotec *NET+* **Watercom**

Measurement • Control • Dosing • Flocculation • Filter • Monitoring • Information • Optimization

One system - everything included

The first compact pool and spa management system worldwide!

The system is conveniently operated via a **touch panel**. All important parameters are available at a glance. A traffic lights system highlights messages.

The choice is yours: Water care with chlorine or active oxygen. **dinotec measuring cell systems** stand for precision and top water quality!

dinotec **START LEVEL BUS**

peristaltic dosing pumps stand for precise dosing and a long operating life of the stepper motor. Special highlight: container fill levels are continuously measured and reported.

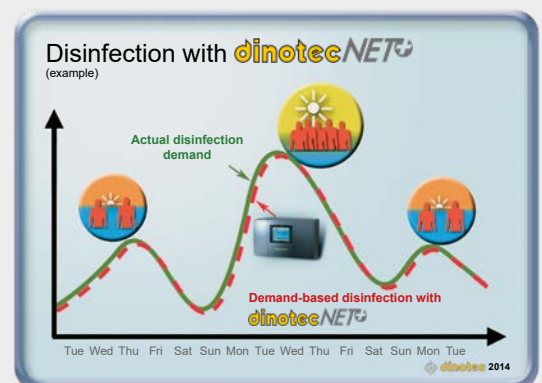

Ready for **dinoREMOTE**: Including secure remote control and remote maintenance features via your smartphone, tablet, etc.*.

Watercom dinotecNET+ ready system components:

- **dinotecNET+ ready:**
 - User interface, colour touch panel 5.7" in system housing
 - Measurement module for chlorine/Poolcare, Rx, pH, temperature and sample water control
 - Control modules for pool and spa management
 - "universal fm" with electrode set, temperature sensor PT 1000 and accessories
 - Peristaltic dosing pumps dinodos Start LEVEL BUS 0 – 11,000 ml/h, incl. suction lances, level control and accessories
 - Version with external touch panel optionally available
- **dinotecNET+ ready pool and spa management system (touch panel in system housing or external)**
- **dinoREMOTE remote control/remote maintenance**
- **Filter tank Senator S (610 or 765)**
- **Speck filter pump (optionally also speed-controlled)**
- **BESGO automatic backwash valves (piston valve)**
- **Measuring section (universal fm or flow valve) with all required electrodes and fiber filter**
- **Disinfection with chlorine or Poolcare chlorine-free**
- **Dosing station dinodos Start Level Bus for disinfection, correction of pH level and flocculation**
- **Control of attractions**
- **Light control with integrated colour changer**
- **Balance tank control (option)**
- **Control of additive UV disinfection (dinUV CLEAR)**
- **Temperature control Optionally with additional solar control**
- **Optionally control of in-situ electrolyser**
- **WATERCOM assembly unit**
- **And much more...**
